application/json

Example Value Schema

```
{
  "message": "string",
  "errors": [
    "string"
  ]
}
```

Headers:

Name	Description	Type
Schwab-Client-CorrelID	Correlation Id. Auto generated	string

403

An error message indicating the caller is forbidden from accessing this service

No links

Media type

application/json

Example Value Schema

```
{
  "message": "string",
  "errors": [
    "string"
  ]
}
```

Headers:

Name	Description	Type
Schwab-Client-CorrelID	Correlation Id. Auto generated	string

404

An error message indicating the resource is not found

No links

Media type

Example Value Schema

```
{
  "message": "string",
  "errors": [
    "string"
  ]
}
```

Headers:

Name	Description	Type
Schwab-Client-CorrelID	Correlation Id. Auto generated	string

500

An error message indicating there was an unexpected server error

No links

Media type

application/json

Example Value Schema

```
{
  "message": "string",
  "errors": [
    "string"
  ]
}
```

Headers:

Name	Description	Type
Schwab-Client-CorrelID	Correlation Id. Auto generated	string

503

An error message indicating server has a temporary problem responding

No links

Media type

application/json

```
{
  "message": "string",
  "errors": [
    "string"
  ]
}
```

Headers:

Name	Description	Type
Schwab-Client-CorrelID	Correlation Id. Auto generated	string

GET

/accounts/{accountNumber}

Get a specific account balance and positions for the logged in user.

Orders
